## Titan Spraying Equipment

The rules and procedures in force where people are at work may require the person responsible for this equipment to carry out a specific risk assessment.

### It is important to read this entire leaflet BEFORE using the Spraying Equipment

- Electricity can be hazardous and must always be used with great care.
- Paints and solvents are highly flammable and toxic and must be used with great care.
- This equipment discharges a high speed spray that can be hazardous, take care not to injure anyone.
- Use this equipment only for the purpose for which it was designed.
- The action of this equipment can cause injury or damage if not used in a careful and controlled way.
- If the spraying equipment has not been used before, operators should familiarise themselves with it before starting work.
- Plan the work and think ahead to make it will be carried out safely.
- Some or all of the following items of personal protective equipment may be required: impact resistant goggles: EN166 - B or BS2092 grade 1; dust mask - a minimum of EN149 FFP3(s) protection; safety boots (EN345 or BS1870 / 4972); safety helmet - EN397 or BS5240; ear muffs or plugs that give adequate protection; gloves.
- This equipment must not be used by minors, or by anyone under the influence of drugs or alcohol.
- This equipment is designed for operation by an able bodied adult. Anyone with either temporary or permanent disability must seek expert advice before using them.

Every effort has been made by HAE/EHA to ensure that the information given in this document and supporting material is accurate and not misleading. HAE/EHA cannot accept responsibility for any loss or liability perceived to have arisen from the use of any such document/material. Only Acts of Parliament and Statutory Instruments have the force of law and only the courts can authoritatively interpret the law.

The Crescent  
Birmingham Business Park  
Solithull B37 7YE

- Wear the safety equipment.
- Do not smoke or use naked flames while handling paints or chemicals.
- Keep other people clear.
- Follow the instructions provided with the paint, thinners or any chemical that may be used when spraying.
- Wash drips of paint or chemical off the skin immediately. Do not let it dry; do not just brush it off.
- Keep hands away from front of gun.
- Do not use without a safety guard and tip.
- Hold the spray gun firmly when squeezing the trigger because the pressure can make it kick back.
- Do not spray over electrical equipment. This could cause a short circuit and fire. It could also deliver a fatal shock.
- Do not aim the spray at people or animals.
- Make sure hands are dry before touching electrical switches or plugs.
- Engage gun safety lock when gun is not being used.
- Stop work if someone approaches the work area.
- When the work is finished, make sure the equipment is thoroughly cleaned before the contents harden.
- Take care when cleaning the equipment especially if using solvents.
- Do not pour paints or toxic liquids into drains; follow the manufacturer's instructions regarding cleaning and disposal - or contact the hire company.
- Return the equipment to the hire shop in a clean condition.
- If the equipment does not work properly do not attempt to repair it. Contact the hire company.
- Please keep this leaflet until the work is finished - it may be needed for reference.
- Ensure high pressure hose is not kinked or running over rough terrain.

### USING THE EQUIPMENT

- Check the equipment and any attachments. If anything is found damaged, do not use it - contact the hire company.
- Use only the equipment recommended by the hire company for the job being carried out.
- Use the equipment only as specified by the manufacturer or the hire company. Do not disconnect any hoses or any part of the equipment while it is under pressure, stop the equipment and release the pressure first.
- Always use the safety devices provided. Always ensure they are correctly fitted.
- Wear strong gloves to protect hands. Anybody who is working nearby will also need to wear appropriate personal protective equipment.
- Make sure that the controls are understood. Before the equipment is used, it must be known how to stop it.
- Return the equipment to the hire shop in a clean condition.
- If the equipment does not work properly do not attempt to repair it. Contact the hire company.
- Please keep this leaflet until the work is finished - it may be needed for reference.
- Ensure high pressure hose is not kinked or running over rough terrain.

### SPRAYING EQUIPMENT

## Before Starting Work...

- Take care, the paints and chemicals used when spraying can be toxic, flammable, or both.
  - Always follow the manufacturer's instructions written on the labels or on the containers.
  - Wash drips or splashes off skin immediately. Thoroughly rinse out eyes and seek medical advice if any type of chemical gets in them.
  - Always put the caps on containers to prevent accidental spillage and put the containers safely and securely away to prevent unauthorised use.
- WORK AREA**
- Make sure that the work area is clear and safe and that no-one is nearby who could cause a distraction.
  - To reduce the risk of serious or fatal injury from breathing toxic fumes, never use spraying equipment indoors unless there is good ventilation. Ensure that there is proper ventilation when working in other confined spaces.
  - Protect other people from danger. Warn others to keep away, put up barriers or warning signs.

### OPERATORS

- The following items of personal protective equipment (ppe) should be worn as a minimum when using spraying equipment. Particular jobs or environments may require a higher level of protection.
- An appropriate dust mask (with a minimum of EN149 FFP3(s) protection) should be worn when using equipment that causes fumes.
- Goggles (EN166 or BS2092) must be worn when using this spraying equipment.
- Wear strong gloves to protect hands.
- Anybody who is working nearby will also need to wear appropriate personal protective equipment.
